WAYNESBORO NURSERIES, Inc.

WAYNESBORO, VIRGINIA

BRANCH NURSERY: Boxwood Gardens, Afton, Virginia

Spring 1940 and Fall 1940

DEPENDABLE PLANT MATERIAL AND SERVICE have held old customers and made new ones, building within a few years time Virginia's Largest Nursery, serving planters in many States. We solicit, on our past record, the continued patronage of our old customers and a trial order from those whom we have not yet served. Our stock and services are being improved from year to year. Our assortment of varieties was never as complete and the quality never better than we are prepared to offer this season. Furthermore, our prices were never before quite so low.

OUR STOCK AND PRICES. Being governed strictly by price in buying Nursery Stock is false economy. The best is the cheapest, even though the initial cost is more. Our prices are based on furnishing vigorous, healthy trees true to name, grown and sold on a small margin of profit and delivered in first class condition. For the benefit of those who are willing to use small sizes of trees and plants and wait for them to grow, we offer the Mail Order Sizes in Shrubs and small sizes of Fruit Trees for less than standard sizes. Our small plants are healthy, true to name, and will give satisfactory results. We, however, believe in most cases

it is economy to purchase medium or larger sizes.

CERTIFICATE OF INSPECTION, issued by Virginia State Entomologist, furnished with each shipment.

TRANSPORTATION. We are located on two trunk line railroads and also have motor freight lines out of Waynesboro, affording the best of transportation service.

PRICES. The prices quoted are f. o. b. our shipping point or for local delivery on our regular truck routes. We make no charge for packing and delivering to our local freight, express, or motor freight office.

TERMS. Cash with other unless otherwise arranged.

REMITTANCES. Remittances may be made by Postal Money Order, Express Money Order, or your personal check, if you prefer.

LIBERAL REPLACEMENT TERMS. While losses from transplanting our vigorous, carefully handled stock are at a minimum, there are always some losses to be expected, regardless of how careful both Nurseryman and planter may be. We agree to share with our

customers any losses from transplanting our stock by refunding at half catalogue list price any plant material reported dead within twelve months after date of delivery, provided the original purchase was paid for as per sale terms and the plant material has been given reasonable attention.

VARIETIES AND QUANTITIES. In case you do not find listed the variety, quantity, or size desired, write for further information.

MAKING UP ORDERS. Do not fail to give sizes, quantities, and varieties wanted. Also give shipping point if different from post office, and approximately when you would like your stock shipped. We furnish 6 at dozen rate, 30 at 100 rate, and 300 at 1,000 rate, with the exception of Berry Plants, Bulbs and Perennials, which are sold not less than 50 at 100 rate, and 500 at 1000 rate, with exceptions noted.

NOTICE OF WARRANTY. While we are very careful to keep our varieties true to name, in the event they should prove otherwise, we cannot be responsible for more than the amount we receive for the stock.

FRUIT TREES

Planters in various communities demand different sizes and varieties, so we offer a large list of both. All of our stock is clean, healthy, true to name, and bears a State Certificate of Inspection. Our list of varieties is carefully worked out. Whether you are planting a commercial orchard or a small home orchard you can make a suitable selection from our list.

APPLES

Our Trees Double Inspected

PRONOUNCED FREE OF DISEASE by Virginia State Entomologist.

PRONOUNCED TRUE TO NAME by Professor Shaw, A National Authority on Identification of Varieties.

Professor Shaw, Mass. State College, reports:

"TO WHOM IT MAY CONCERN:

This is to state that we have examined for trueness to name all the saleable two year Apple Stock of Waynesboro Nurseries, Inc., near Waynesboro, Virginia and as they now stand in the nursery row all varieties are, to the best of our knowledge and belief, true to name."

YORKING

On May 28, 1935, was awarded United States Patent No. 125.

A New Solid Red York having all the good qualities of the famous old York and the tremendous advantage of being a Solid Red, a pleasing purplish red, and coloring two weeks earlier than the standard York.

Yorking is one of only a few Apples ever to be honored with a United States Patent. You can imagine what a Solid Red York—every Apple on the tree being a solid, bright red—would mean to the grower. That is exactly what we offer in the Yorking.

Place your order early for Yorking, as the Yorking is our largest seller and the supply seldom equals the demand.

NEW SOLID RED DELICIOUS (Northwestern Strain)

A "Super" Delicious. An Apple with all the good qualities of the Common Delicious: Same size, same shape, same flavor, same texture and same ripening period, but the New Solid Red Delicious colors two to three weeks earlier and colors solid red without trace or sign of stripe, even into the stem and blossom ends.

VANCE DELICIOUS

1 yr. only

A strain of the New Solid Red Delicious differing from the standard New Red Delicious by coloring earlier. We consider this the best of all the New Red Delicious Strains.

LOWRY

Beautiful dark red Winter Apple, enjoying the reputation of selling for the highest price of any Apple grown in Virginia. Demands the highest prices on markets wherever known. In 1939 in local orchards the first crop of bloom was killed by a late frost, but the trees bloomed the second time and produced a full crop of fruit.

NEW RED ROME

Same as Rome Beauty with the exception of being a solid red.

NEW SOLID RED STAYMAN

Sport of the well-known Stayman, having all the good qualities of the Common Stayman and the big advantage of being solid red in color instead of pale striped greenish coloring found in the Common Stayman. Write for further information.

NEW SOLID RED JONATHAN

Same size, quality and shape as Common Jonathan and differs only by coloring two weeks earlier and coloring solid red. **Lady.** 1 yr. only. Small, golden background, red blush; highly flavored; excellent quality. Demands unusually high prices, having sold for as much as \$20.00 per barrel on U. S. markets and is equally as popular on export markets. Trees very scarce.

Lodi. 1 yr. only. An improved, larger Yellow Transparent.

New Red Duchess. Differs from the Standard Duchess by having more color and coloring earlier in the season.

Summer Yellow Delicious. A Golden Delicious which ripens in July. Most promising new Summer Apple known.

Yellow Delicious. Resembles Grimes Golden but larger, more prolific, and earlier bearer.

(APPLES, Standard Varieties— Continued.)

Stayman. One of our most popular commercial Apples of the Winter varieties. Large, red, green striped.

Summer Rambo. Undoubtedly one of the best Summer varieties of its season. Large striped, excellent quality. Ripens in August.

Sweet Paradise. Most popular Fall sweet Apple.

Turley. Somewhat resembles Stayman but has better color and is larger. Does not crack. Yellow flesh. More regular bearer than the Stayman.

Virginia Beauty. Resembles Delicious in quality and shape; darker and extra fine quality.

ONE TREE ORCHARD. An Apple Tree on which four varieties are grafted, ripening early Summer, late Summer, Fall and Winter—affording fresh fruit over a period of several months. A 3 yr. tree, 5 to 6 ft., \$2.00 each; 2 for \$3.50.

Winesap. Standard commercial variety. medium size. Solid red.

Winter Banana. 1 yr. only. Large golden yellow Fall variety of excellent quality.

Yellow Transparent. The earliest Apple on our list. A very popular early Apple. Medium size and excellent for cooking purposes.

York Imperial. Most extensively planted Apple in Virginia but is now being displaced by Yorking, the Solid Red York.

Town Talk. Five varieties growing on one tree. See General Catalogue for description. 3 yr. 6-7 ft., \$2.50 each, two for \$4.50, 1 doz., \$24.00.

TRIPLE TREE. A combination grafted tree furnishing three varieties of Apples ripening at different seasons. 5-6 ft., 3 yr. trees, \$1.50 each; 3 trees for \$4.00.

PEACHES

A GOOD TIME TO PLANT PEACH

Peaches have always been a quick money crop and one of the most profitable fruit crops. Peach planting for the past five years has been light and we predict planting made at this time on suitable land affords an opportunity for greater profits than ever.

MUCH DEPENDS ON THE TREES YOU PLANT

Our Peach Trees are budded on the old-time native hardy seedling Peach, giving them the best root system possible and our buds are cut from bearing orchards, assuring our customers of trees true to name. Our sandy loam soil is also conducive to a vigorous, fibrous root system. Our modern tree digger enables us to dig trees with all their roots. Our experience in growing many million trees has taught us how to handle and deliver in such condition that the best of results may be expected.

With the many advantages we have in growing Peach we can quote our trees at very reasonable prices, seldom costing more than trees you could not afford to plant.

For your convenience we are listing our Peach in ripening order. If more complete descriptions are required write us or consult our local representative.

PEARS

Pears will continue to be scarce and sell for good prices as few have been planted within the past twenty years. Plant now for both home use and market.

Bartlett. Well known. Most popular Summer Pear. Ripens August.
Cayuga. Improved Seckel.
Clapp's Favorite. A young and early bearer. Very good quality.
Flemish Beauty. Large, juicy Pear. Prefers sunny location. September.
Garber. Rapid grower, good quality. Splendid where assortment is demanded. September.
Kieffer. The most extensively planted Pear. Quality not as good as some, but one of our best canners.

Seckel. Small, sweet, excellent quality. Fine for pickling, canning, or eating from the hand.

APRICOTS and NECTARINES

can be grown wherever Peaches can be grown. Many planters are neglecting to plant these fine profit-making fruits. We offer the hardy Russian variety of Apricot and Sure-Crop, a new, improved, hardy Nectarine.

Same sizes and prices as Plums.

FIGS

Brown Turkey and Celestial. 2-3 ft., \$1.00 each, \$10.00 per doz.

QUINCES

A very popular fruit which is seldom found on the market, but always in demand. Quinces demand from \$3.00 to \$4.00 per bushel. Orange is the best variety. Champion is another good variety.

Varieties: **Orange and Champion.**

Same sizes and prices as Plums.

Japanese Improved Persimmon. 4-5 ft., \$1.50 each.

QUINCE, JAPANESE. A dwarf, shrub-like bush not growing more than 8 feet in height. Starts bearing very young. Golden-yellow, highly flavored, aromatic fruit, which makes most delicious jelly and marmalade. Especially useful for mixing with Apples, giving them a spicy, quince-like flavor. Often bears the first season after being transplanted. 2-3 ft. size, \$1.00 each, \$10.00 per dozen.

GRAPES

Grapes require little space and attention. Surely you have a place for a few. The collection we offer will furnish Grapes from the earliest to the latest.

Brighton. One of the most popular reds. Excellent quality.

Moore's Early. Best early blue.

Concord. Most popular blue.

Pecans

STRAWBERRIES

There is more variation in the price of Strawberry plants than most Nursery Stock. Why is it? There is a reason. Some dig plants from old bearing patches and sell the plants as a by-product. They must necessarily be sold at a low price as the more experienced planters will not use such plants. Hence such growers must find customers who buy where the cheapest plants are to be had, regardless of whether they are old or new. We agree to furnish at half list price plants for replacing any plants which may be lost the first season from causes beyond our control.

Varieties are listed in ripening order, so you may make a selection ripening from the earliest to the latest.

FAIRFAX—A New Sensation. Early, prolific, unusually productive, large and firm. Introduced by U. S. Department of Agriculture.

DORSETT. Another U. S. Department of Agriculture introduction. Early, productive, frost resistant, large, firm. One of the most promising new varieties.

Klondyke. An old favorite. Early, sweet.

Premier. The most popular commercial variety. Good size, excellent quality.

Blakemore. Recommended by Department of Agriculture as an outstanding new variety. Supersedes Premier in yield and quality.

Aroma. Well known Midseason variety.

Big Joe. Extra large. Midseason.

\$2.00 per 100, \$3.50 per 250, \$5.00 per 500,
\$7.00 per 1,000, \$30.00 per 5,000.

Gem Everbearing

EVERBEARING VARIETIES

Gem. Starts fruiting in May, after being transplanted in April. As large as the Mastodon and much more prolific. The ideal home Berry. Per 50, \$1.75; per 100, \$3.00; per 250, \$6.00; per 500, \$9.00; per 1,000, \$15.00.

Mastodon. Large and most popular Everbearing until the recent introduction of the Gem. Per 100, \$2.50; per 250, \$5.00; per 500, \$8.00; per 1,000, \$12.00.

Landscape Service. We employ a professional landscape architect and a number of practical, well trained field men whose services are always available for our customers. If we can be of any service to you, do not hesitate to call on us.

Our standard grade of stock is grown chiefly

for the larger landscape developments and is not to be compared to light Mail Order Grades often quoted. Even the smaller stock we list as "Mail Order Grade" is well rooted, branched, and much of it will give immediate effect.

Make use of our Landscape Department. We have established it for your benefit and it is at your command. If too far away for one of our landscape men to see you, send in measurements of your grounds and a photo of the house for suggestions.

PRIVET HEDGE

Amur River, The New Evergreen
Type Hedge

A Privet hedge is much cheaper than a fence and is far more attractive. It not only serves the purpose of a fence, but is decidedly more ornamental. Plant in a straight row six inches apart. Cut back to within three inches of the ground when transplanting and you will have a dense, compact hedge within a short time.

AMUR RIVER PRIVET (Evergreen)

New evergreen, Southern type. Makes a very dense, compact hedge, resembling Boxwood. It holds its foliage throughout the average winter.

EVERGREENS

We take pride in our Evergreens and our method of preparing them for our customers. We shear carefully to make them uniform, compact specimens. When we prepare them for shipment we take them up with the soil in which they were grown and tie the soil firmly about the roots with burlap and rope. You will find that our Evergreens will grow almost without exception.

The New Soil Conditioner and Plant Food. "Rho-Za-Grow" has taken the guesswork out of Rhododendron growing.

Rhododendrons and their kindred Broad-Leaved Evergreens, the Azaleas, Kalmias, Andromedas, etc., are lovely things, but many planters hesitate to plant these aristocratic American Shrubs because of their exacting soil requirements.

"Rho-Za-Grow" is a scientifically balanced soil conditioner and plant food. Use it on all plants requiring sour soils. "Rho-Za-Grow" contains exactly the proper balance of acids, neutral plant food, and humus. It sours and lightens the soil, and it has high plant food content.
